

Kursusbevis

Det bekræftes hermed at

Thomas Carnell

i perioden 7. april - 19. maj 2026
har gennemført kurset

Grundlæggende programmering med C#

Kursusindhold

Programmering med C#

- Object-oriented design patterns
- Variable types, fields & properties
- Namespaces, classes, constructors & methods
- Data structures: Generic collection, arrays, lists and linked list
- Encapsulation: Data privacy & access specifications
- Value type & reference type
- Polymorphism: Overloading & overriding
- Inheritance: Multiple and multi-level inheritance
- Abstraction: Abstract data types and method
- IEnumerable, IEnumerator Enums
- Delegates and their uses
- Asynchronous programming: Threading, tasks, Async-await
- Parallel programming: Parallel Loops and PLINQ

App-udvikling med C#

- Use of Visual Studio as debugging tool
- Layered architecture
- Data layer: SQL, SQL Server & Entity FrameworkCore
- UI, Web frontend: Html-DOM, CSS, Bootstrap, JavaScript, AJAX, XML, JSON, HTTP & Web Socket Protocols and HTML APIs
- C# web programming patterns
- The MVC design pattern
- ASP.NET MVC Core design pattern
- Web Services and REST Web API
- Using Authentication and Authorization
- Single Page Applications and JS Frameworks
- Single Page Applications with Blazor
- Server, WASM and Auto Render modes
- Introduction to Machine Learning with .Net
- Integrating AI with Web App
