👤 PROFILE

I am passionate about designing and producing industry-standard games and assets for modern interactive media, valuing effective communication and creativity. My commitment to ensuring productions function flawlessly is reflected in my diverse project experience, including research, internships, academic, professional, and passion-driven endeavors. I excel in roles that foster teamwork, value informal sparring sessions, and promote an open atmosphere for clear expectations and healthy cooperation. I have a big interest in VR applications, especially in research-esque settings. I'm used to holding several roles, such as project manager/producer, programmer and different design positions, as well as working with practical hardware doing low-level technical tasks. My dream is to do work where both my background as a developer- and academic, is being utilized, while still having headroom for personal development.

🧠 SKILLS

C# — Object-Oriented Programming, Intermediate

Unity3D — Component-Based Workflow | 2D, 3D, VR, Mobile, WebGL, Many Extensions

C++ — Arduino Toy Development

Java — Game Development via Processing

Version Control — git, gitLFS & Plastic

Workspace Tools — Notion, Trello, Hack'N'Plan, Miroboard, GoogleSuite

Communication Platforms — Discord, Slack, Teams, Zoom

Audio Implementation — FMOD2, Wwise, Unity Audio

Audio Production — Logic Pro X, Ableton, Pro Tools, Reaper

Bonus — I have two cats, I grow my own chilies, I love cooking and I play lead guitar in two heavy metal bands

📁 PROFESSIONAL EXPERIENCE

Footstomp Studios, Game Designer ↗

02/2019 – present | Free time Passion projects - Remote
Production Cycle for several Multiplayer Games
Production & Implementation of Audio Assets in Unity, FMOD & Wwise.
Prototyping, Testing & Programming of Design Concepts
Steam-Release & Community Testing
Utilizing emerging software-tools for Unity multiplayer networking

Silvan, Sales

04/2025 – 10/2025 | Greve, Danmark
Operation, Managing, Closing, Truckdriving

Recreational Fear Lab (Aarhus University), Sound Designer ↗

04/2022 – 09/2022 | Remote
Production & implementation of audio assets for Hyper-realistic VR simulations
Sound Design for escape rooms
Consultation

Dystopia Entertainment, Gothamster Studios, Freelance Sound Designer

2020 – 2022
Various Sound Design Tasks

Fabula Studios, Sound Designer Intern ↗

2021 – 2021 | Copenhagen
Production & Implementation of Sound Design for 2.5D Game
Foley Recording
Design of Audio Systems in Unity
Consultation

🎓 EDUCATION

Master Of Science In Games, ITU Copenhagen

2022 – 2024
The Design Track specialisation teaches you how to be creative with play design methods. From playfully exploring the potential of new technologies to the psychology of why and how we play, it provides a toolset and theoretical grounding for creating innovative interactive experiences. Courses include:

- Conceptualize, prototype, design, develop, and test a digital game individually and in teams.
- Reflect on the relation between design and technical implementation in innovation-driven projects.
- Practice different concept development, sketching, prototyping, and game design methods.
- The politics and ideologies of games, player cultures, edutainment and gamification
- Participation DADIU fall '23

Bachelor's Degree in Sound Design, Sonic Collage

2016 – 2020
The programme is a professional foundation in music and sound production, with an equal focus on the commercial, communicative and artistic aspects - mainly taught by working industry professionals. Courses include:

- Audio Engineering
- Game Audio (Unity Audio, FMOD, Wwise)
- 3D & Binaural Audio
- Interactive Sound Design
- Project Management

Higher Technical Exam (HTX), HTX Viby

2008 – 2011
A Levels in:

- English
- Communication & IT
- Robot Tech
